

Biosynthetic Pathways

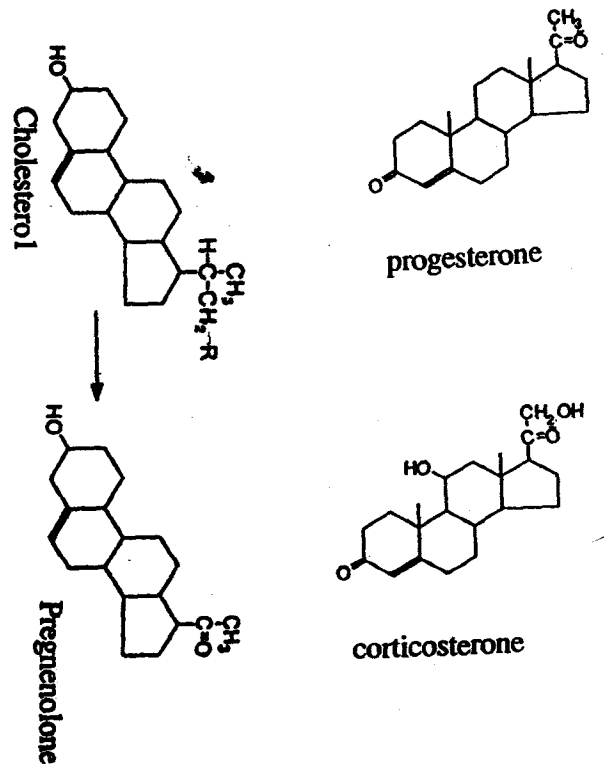

- androstenedione
- testosterone
- estrene, estradiol, estriol
- all cortisol and corticosteroids
- aldosterone

Reproductive Effects

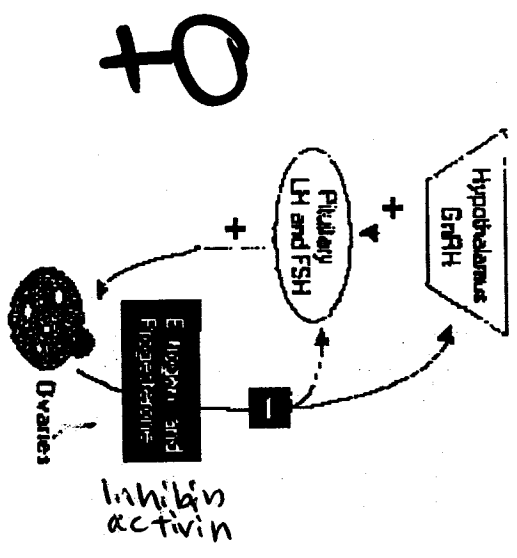

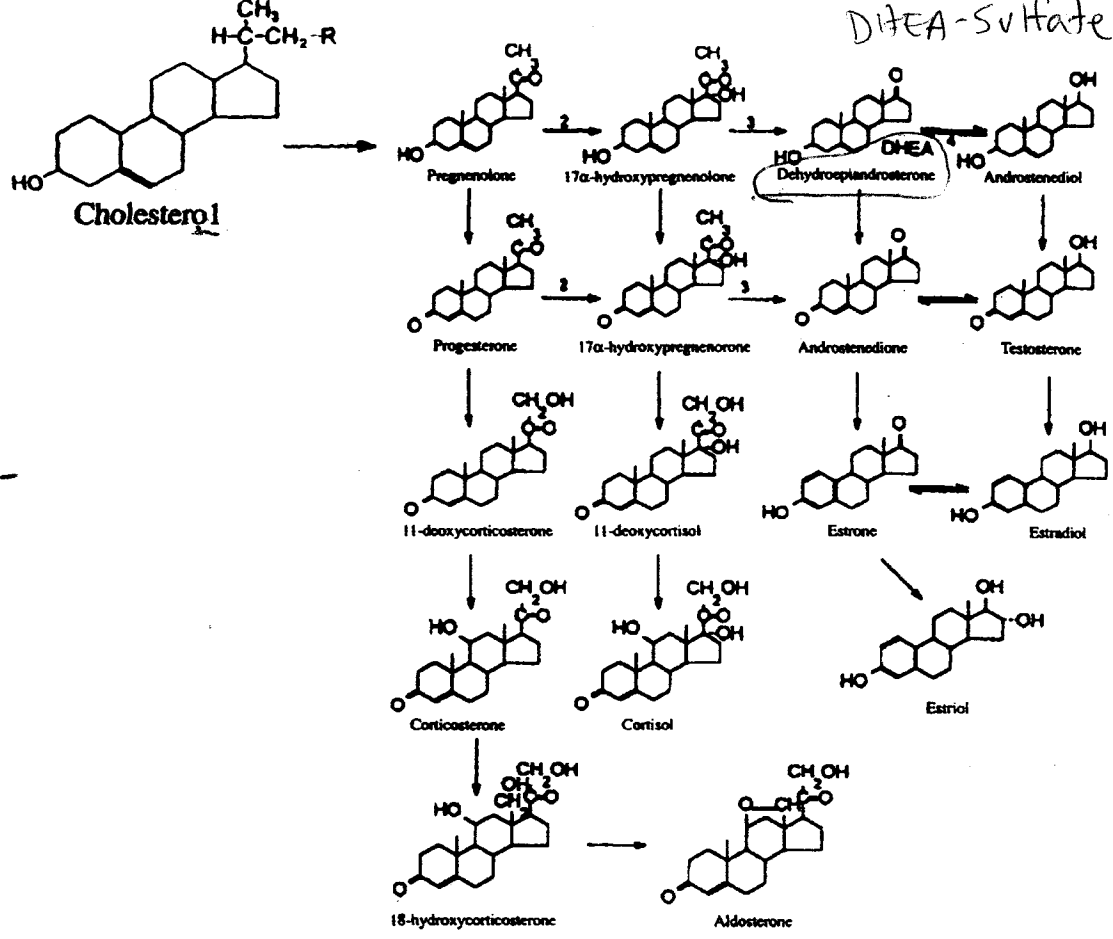

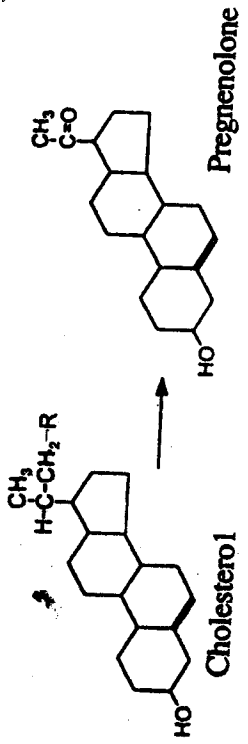

- secretory endometrium
- survival of embryo
- development of fetus throughout gestation
- libido

Intrinsic Effects

- mild diuretic helps use fat for energy
- natural antidepressant
- helps thyroid hormone action
- helps normalize blood clotting
- helps normalize blood sugar levels
- normalizes zinc and copper levels
- maintains proper cell oxygen levels
- protects against breast cysts
- protects against breast cancer
- protects against endometrial cancer
- moisturizes skin when used topically
- counteracts estrogen side effects

DHEA-Sulfate

Biosynthetic Pathways
 androstenedione
 testosterone
 estrone, estradiol, estriol
 all cortisol and corticosteroids
 aldosterone

Reproductive Effects
 secretory endometrium
 survival of embryo
 development of fetus
 throughout gestation
 libido

Intrinsic Effects
 mild diuretic helps use fat for energy
 natural antidepressant
