TBM MODULE 1

BASIC PHYSIOLOGICAL EXAM & AUTONOMIC RECOVERY PROGRAM

FOUNDATIONS OF NATURAL HEALING

Total Body Modification (TBM) is a time-tested, easy-to-use system of healing that relies primarily on analysing the client's body through Kinesiological evaluation of TBM-specific body points and radionically-charged TBM test vials. In TBM we don't suppress or ignore our clients' symptoms, we seek to respond to them in a way that restores the body's ability to heal and maintain itself. Corrections are similar to known Kinesiology techniques and some others that all therapists can use with confidence. Most often, immediate results are apparent. We offer these techniques in a unique kinesiological format, and how you may best integrate them within your existing know-how.

In TBM we use nutrition to support, but not drive the healing process, therefore significantly reducing the amount of nutritional supplements a client needs. In Module 1, the first part of the TBM Basics, you will learn how to apply effective muscle testing with body point locations, body point corrections, and our Autonomic Recovery Program. The Autonomic Recovery Program resets the overall tone of the autonomic nervous system, safely detoxifies the body, re-establishes healthy regulation of blood sugar and energy efficiency, and educates clients on how to listen to their body's needs.

Principal Kinesiology Connection

Our policy is that upon registering for a TBM seminar you commit to arriving on time and staying until the end. Those that do not fully attend will not receive a certificate of completion, will not have it listed on their Provider Listing, and will not receive verification of hours for Continuing Education. Any exception must be approved prior to registration.

11-12 APRIL 2026 - SAT & SUNDAY 9am-7pm
